

LUASTRO NEWSLETTER

Hey everyone! For this week's newsletter we have our upcoming events and a few new photos to share with you!

Next social (14/11)

For our last social of this term, we will be having a Christmas quiz tomorrow at 8pm in Furness LT1! Hope to see you there!

Observing sessions

As the term is ending, there are not many other opportunities to do observing sessions but we'll come back strong next term!

Photo gallery

Photo taken from <https://apod.nasa.gov/apod/ap221206.html>

This is the 6th November APOD (Astronomy Picture of the Day) showing the Pillars of Creation in detail Eagle Nebula (M16). This was taken by JWST (James Webb Space Telescope) in near-infrared light. It is currently birthing stars and it appears solid because of its high dust content and great depth although it is very low in density.

Contacts

Don't forget to follow us on our socials and discord [here](#) and clear skies everyone!

Best wishes and happy holidays! - MJ (LUAstro Secretary)
